Hiring Manager

Subject: Application for Software Developer/ML Intern Position

Dear Sir/Madam

I am writing to express my enthusiastic interest in a Software Developer/Machine Learning position at **Econet Wireless Zimbabwe**, as a motivated and detail-oriented Computer Science student with hands-on experience in front-end development and machine learning.

Currently pursuing my Bachelor of Science in Computer Science at Midlands State University, I have built a solid foundation in key technologies, including **HTML, CSS, JavaScript, Python, and SQL**. My project work has allowed me to apply these skills in practical settings. For instance, I designed and developed my personal portfolio website (available at juliuslabs.netlify.app) from scratch using HTML5 and CSS5. Additionally, I have explored machine learning by developing a model using deep learning to address nutrition-related queries.

My technical abilities are complemented by strong teamwork and leadership skills. I am a proactive learner, passionate about new technologies, and can thrive in collaborative environments. I am eager to bring my skills to **Econet Wireless Zimbabwe** and contribute to your team while working under supervision and growing as a developer. I'm willing to learn and get new opportunities, to grow in the field and as a person.

Thank you for considering my application. I have attached my CV for your review and welcome the opportunity to discuss how I can be an asset to your team in an interview. I'm open to new opportunities and I am willing to learn.

Sincerely,

Tinotenda JD Tamangani
