Dear Sir/Madam

RE: Application for ICT Intern Position

I am writing to formally express my interest in an ICT Industrial Attachment position at your organization. As a third-year Computer Science student at Midlands State University (MSU), I have developed a robust technical foundation and a passion for leveraging technology to solve complex problems. I am eager to contribute my skills to your team while gaining professional experience in a high-performing environment.

Throughout my studies, I have maintained a strong focus on practical application and innovation. My experience ranges from developing full-stack web applications to fine-tuning large language models for specialized tasks. Notably, I have successfully competed in regional hackathons, where I collaborated with teams to build scalable solutions under tight deadlines. These experiences have refined my ability to troubleshoot complex systems and adapt quickly to new technical stacks.

I am particularly drawn to your organization's reputation for excellence and innovation. I am a detail-oriented individual who thrives in collaborative environments, and I am fully committed to adhering to professional standards while assisting your ICT team with system maintenance, software development, or daily technical operations.

I am confident that my proactive learning attitude and technical background will make me a valuable asset to your team. I welcome the opportunity to discuss how my skills align with your organization's goals during an interview.

Thank you for your time and consideration.

Yours Faithfully,

Tinotenda J. D. Tamangani
